DETAILED ACTION

Claim Interpretation

Claims 21-32 define the macrostructure product by how the product was made. Thus, claims 21-32 are product-by-process claims. For purposes of examination, product-by-process claims are not limited to the manipulation of the recited steps, only the structure implied by the steps. See MPEP 2113. In the present case, the recited steps imply a structure of a crystalline molecular sieve having a continuous three-dimensional network matrix and porosity. In the prior art rejections below, the references disclose or teach such products.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 21-24 are rejected under 35 U.S.C. 102(a) as being anticipated by Sterte et al. (SE 9802303-A).

Sterte et al. discloses crystalline molecular sieves in the form of three-dimensional networked porous macrostructures. See the paragraph bridging pages 7 and 8 of the translation filed with the IDS of July 1, 2003.

Application/Control Number: 10/611,445

Art Unit: 1755

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 25-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sterte et al. (SE 9802303-A) in view of knowledge of the ordinary skilled artisan.

As noted above, Sterte et al. discloses a crystalline molecular sieve that anticipates the presently claimed molecular sieve. Sterte et al. fails to expressly disclose employing such molecular sieves in hydrocarbon conversion processes.

However, one of ordinary skill in the art recognizes that crystalline molecular sieves marcrostructures are useful in hydrocarbon conversion.

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have employed the molecular sieve of Sterte et al. in a hydrocarbon conversion process because such a use of a molecular sieve was notoriously well-known to the ordinary skilled artisan.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 1755

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Sample whose telephone number is (571)272-1376. The examiner can normally be reached on Monday to Thursday and alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Bell can be reached on (572)272-1362. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-247-9197 (toll-free).
